

SLEEPER LIFTING TOOL SLT400

The Sleeper Lifting Tool - SLT 400 is designed to load and unload sleepers from railcars safely and efficiently.

- It can easily be fitted to a crane, a railroad excavator or another suitable machine.
- It is easy to adjust the SLT400 for different sleeper types including both timber and concrete.

The Sleeper Lifting Tool SLT 400 handles the sleepers by moving the telescopic frame in and out while the gripping claws are static. The SLT 400 requires only 60 mm of space outside the sleepers for grabbing. Foldable side supports enable the operator to swiftly position the SLT 400 for proper lifting.

As an option the unit can be equipped with a safety lifting device to prevent the operator from dropping sleepers.

SPECIFICATIONS

Weight	400 kg
Width	1340 mm
Length min	2126 mm
Length max	2846 mm
Height	540 mm
Item number	5000-540

*Please note that the unit pictured above could be equipped beyond standard.
